

# PAM® 13 British Scoresheet

Level 1

Level 2

Level 3

Level 4

Measure. Engage. Activate.

## Activation support starts with successful PAM administration

The **Patient Activation Measure® (PAM®) 13 British Scoresheet** is an easy-to-use tool that instantly scores PAM 13 British and saves the results for further evaluation.

Each patient's answers are scored separately by Insignia's secure data server hosted in Dublin. As such, the scoresheet does not require the release or transfer of secure patient data. It can also be integrated into an EMR or care management software system without the need for technical integration or code development.

**Patient Activation Measure® PAM® 13 British**

**This tool is provided under License between Insignia Health and NHS England** Version: 13UK1

Refer to **Introduction** tab to read Insignia Health Privacy Policy.

---

Please, enter the following information: Total number of surveys entered: 0

Your name:

Your organisation:

Member / Patient ID:  ID is required and only stored in the attached records page. The max is 50 chars.

Survey completion date:  Date format: dd/mm/yyyy. Date range: 1/1/2014 to today's date.

Select the response from you member/patient for each survey statement. All statements must have a response. Enter N/A if the statement is not applicable or the member/patient is unable to answer. PAM is available in other languages, please refer to the information packet or contact Insignia Health at [infoUK@insigniahealth.com](mailto:infoUK@insigniahealth.com).

Survey Introduction to member/patient:  
We would like to learn more about how you view your health so we can better tailor our interactions and care just for you. There are no "right" or "wrong" answers to this brief survey. Please answer these 13 statements with what's most true for you.

1. I am the person who is responsible for taking care of my health.

2. Taking an active role in my own health care is the most important thing that affects my health.

### Key Features

**Password secured.** Each copy of the scoresheet has an encrypted passkey.

**Unique per Affiliate.** Each NHS Affiliate has a unique version for use and distribution to its associates.

**Current PAM algorithm.** You will always be scoring to the latest version of PAM level calculations.

**Privacy ensured.** Insignia creates a GUID (Global unique identifier) for each patient to maintain confidentiality. Only responses to PAM statements and GUID are sent to our scoring server in Dublin.

**Instant scoring.** PAM score and activation level are returned to the scoresheet within seconds when you have an active internet connection.

**Data recovery.** PAM responses, score and level can be retrieved upon request to Insignia Health.

**Runs on Microsoft Excel.** The scoresheet requires Windows 7, 8 or 10 and MS Excel 2010, 2013 or 2016.

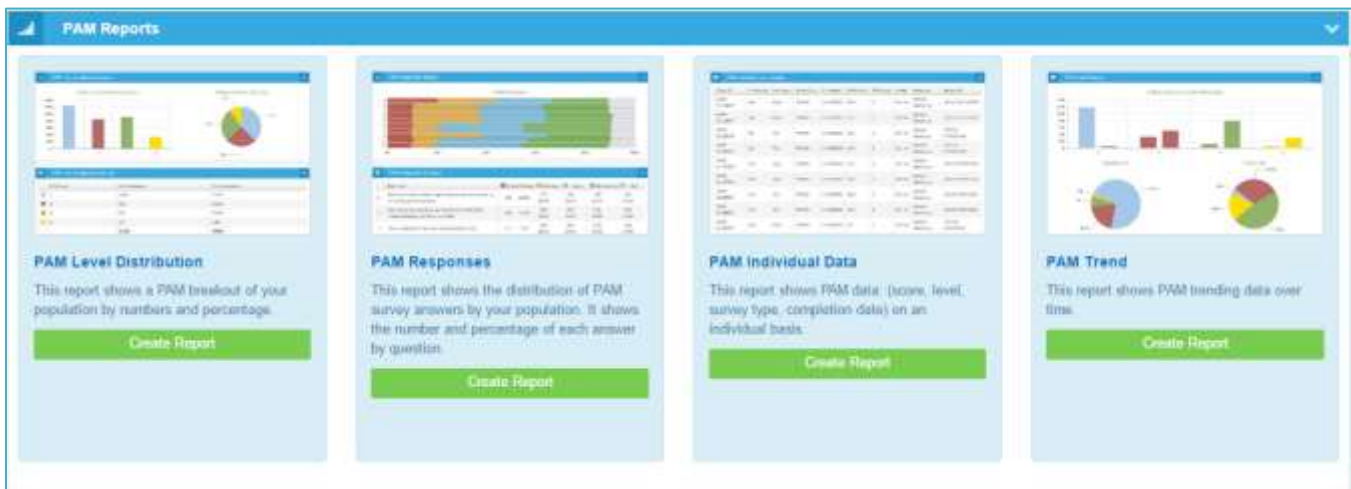

## Gain valuable insight through storing and sorting

PAM results for each patient are saved in two tabs. The *Copy Records* tab contains a protected list of all records so there is no chance of accidentally deleting data. The *Sort Records* tab contains all the same information, but enables administrators to sort the data by score, level, patient and survey administration date.

Insignia will also provide each Affiliate with quarterly aggregate reports for all of the PAM score and level data accumulated from each copy of the scoresheet used by the supporting organizations.

Available reports include:

- PAM Level Distribution – showing the splits by number and percentage
- PAM Responses – showing the distribution of PAM answers for each PAM statement
- PAM Individual Data – showing results of each survey in a sortable format\*
- PAM Trend – showing the redistribution of a populations PAM level over time

\*Member ID is not passed to Insignia Health. If a patient has PAM administered on two or more scoresheets, that data will not be automatically synched or consolidated between those scoresheets.
